

Disassembling Konnet PowerEZ Pro External Battery

How to open the device

Written By: Mike

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Small Phillips Head Screwdriver](#) (1)
-

Step 1 — External Rechargeable Battery

- Take a small flat screwdriver or any plastic opening tool and start to remove the silver cover.
- The backing has lots of double sided tape to hold this down so some force will be required.

Step 2

- Remove 4 Philips screws to release the plastic cover

Step 3

- Carefully push from the side you just opened. All the inside parts should slide out from the back of the unit.

To reassemble your device, follow these instructions in reverse order.
